

## Respect for the future

We want to be a responsible community member. We want to grow and succeed together with the people around us. Therefore, we integrated social responsibility into our business philosophy. We act according to our CSR platform *Respect for the Future*.

*Respect for the Future* is promoting rational consumption of our planet limited resources and care for the nature. Our employees are the best example that a positive attitude towards future and nature can be adopted with success in our daily lives.

Our employees took part in all our social responsibility projects. Together we have refurbished five parks in Bucharest, Pitesti, Moinesti, Ploiesti and Timisoara. Now, these parks are parks of the future, where young and old can enjoy together the fresh air and the open-green color of nature.

When we decided to build six houses and repair another 66, our employees volunteered to work on the constructions sites. They gave hope and aid to poor young families from Moinesti, Comanesti, Asau, Dofteana and Darmanesti. Petrom volunteers and local community volunteers provided 95% of the work needed.

When responsible use of resources is at stake, our employees are our ambassadors. They have understood that it is easy to save energy and resources at work and at home. Their responsible behavior gives us the opportunity to be an example for the community and to plant deeper the seeds of sustainable living.
